Upper Extremity Stability

These toys and materials encourage the use of arm/hand in slow, controlled movements away from the body and against gravity. This also improves the shoulder stability and mid-range control of the arms needed for improved hand skills.

WACK-A-MOUSE

Old time favorite arcade game can now be played conveniently at your own kitchen table or anywhere. Watch those little critters carefully and when they peek their heads out of their holes, use the hammer to knock them back down. The quicker and more successful you are at making contact, the more points you score. Great for improving eye-hand coordination, shoulder stability, strength and response time – so wack away! **U0680 Discontinued**

UFO

Great toy for working on bilateral coordination and visual tracking. Load 1, 2, or all 3 of the 8-in diameter flying disks, hold handle firmly and pull power cord out quickly. Watch the disks take flight soaring into the air or spinning on the ceiling. **B9327**

DOINKIT™ DARTS

Best quality and best designed magnetic dart set anywhere! Light weight DoinkIt™ material keeps the 6 darts flying straight while super magnets in the tip keep them where they hit. No more sliding or falling off the official 16" board. Playing darts is great for working on upper extremity and shoulder stability, throwing skills, wrist extension and palmer arching, and eye hand coordination for aiming. A terrific family or clinic activity! **U3944**

DOINKIT™ DART REFILL

6 darts in 2 colors that will work on any magnetic dart board. So keep your board and just upgrade the darts. **U3946**

EGG & SPOON RACE

You get 4 colored spoons and matching eggs. Balance your egg on the spoon and race to the finish line. Run, walk, kneel walk, walk backwards, etc...

but drop your egg and it will crack, spilling its "yolk like" bean bag. Classic relay game working to improve shoulder and arm stability and to help slow down and organize those "hyper" kids.

U0572

RAPIDO

A fast-paced game needing quick hands and quicker eyes. Two to four players race to be the first to fill their collection tubes with the correct sequence of colored balls. Collection tubes must be held in a neutral forearm or "thumbs up" grasp, so thumb can cover top

opening in tube preventing balls from accidentally spilling out. Balls are collected by placing tube over balls and pushing down. Reinforces a very important hand position and its lot of fun as well. Shake things up and try it with your non-dominant hand! **U3230 Discontinued**

GIANT 4 IN A ROW

Oversized plastic game board measures 18" x 21" allowing this classic strategy game to be played in many different positions. With the game on the floor, try playing from a side sit, kneeling, or half kneel position or while sitting on therapy balls or T stools. With game on a table top, placement of the playing pieces becomes a challenge of upper extremity range of motion and shoulder stability. Single players will enjoy placing pieces and creating patterns with the 21 white and 21 black discs. Great motor and perceptual fun for use in clinics, classroom or home setting. **U2942**

Upper Extremity Stability

RAINBOW RIBBONS

Put this beautifully crafted and brilliantly colored 7 foot long ribbon on a stick into a child's hand and watch them create eye-catching swirls, loops, wiggles and squiggles. Develops motor coordination and builds arm and shoulder stability. Try one in each hand for a bilateral twirling challenge.

U2021

TECNO

This toy will quickly become one of your top 10 tools for therapy! Similar in design to a classic erector set but these pieces are colorful plastic. Bigger, easier to handle pieces still provide a real fine motor planning and visual perceptual challenge. Comes with enough pieces and tools to copy the 12 designs in the Tecno manual to make your own creations. Nuts, bolts, girders and brackets all screw into the building platform which is also the top of the carrying case. Two and 3 dimension building is possible. Kids love this toy and have a real sense of mastery and accomplishment when they finish a design. Also works great at home or as a classroom center.

B7655

FISHING FEVER

Fisherman of all ages will respond to this challenging game of "catch the fish"! Comes with 4 rods with hooks, 4 matching stands and 12 fish. Players must literally hook a fish, no magnets here, and then carefully maneuver that fish onto their stand. Played indoors or out, with friends or alone, this is a great way to build shoulder stability and ability to focus. Hope you catch the Big One!

U8933 Discontinued

MAGNETIC WHEEL

The plastic wheel will continuously rotate around the 9" metal frame if moved with appropriately timed, smooth graded movements.

M3909

BALANCE BIRD

Plastic birds with a wind span will balance on your fingers if you let them. See how long you can balance the bird on finger or plastic perch, while you stand on one foot, jump, walk or move your arm around. Also try bird on your nose contests or a bird in each hand.

U3434

CHINESE YO-YO

This Yo-yo on a stick is easier than a standard yo-yo. Encourages controlled, isolated movements of one hand and wrist. Small, lightweight and inexpensive.

M4805

MAGNETIC EXPRESS

Use the magnetic wands to guide the 5 red and 5 blue metal balls through the maze. Fully enclosed-no parts to lose. Finely crafted of wood and plexiglass. Develops problem solving skills, visual tracking, eye-hand coordination and logical thinking. Dry erase markers (not included) can be used to draw various destinations for players. Play alone or with a friend. Have a race! Also can be used as a bilateral hand held maze. Tilt board to maneuver the balls through the maze.

U4503

JELLY FLOWER YOYO

You get 3 colorful tiers of squeezable, stretchable flowers that will bounce and spin like nothing else! Body stance is similar to when using a yoyo so you get a great mid-range upper extremity workout. But soft, lightweight material makes it much safer and more kid and house friendly than a hard yo-yo.

U3456 Discontinued

MAGNETIC NUMBER MAZE

Use the attached magnetic wand to guide the correct number of balls into the numbered baskets. Working backward from 10... or forward from 1... you get lots of opportunity to move balls around using the magnetic pen. A fun way to have children practice their pencil control, visual tracking, direction following and auditory memory skills. Also try as a hand held marble maze.
