Air Filled Seat Cushions:

Kids think these seat cushions are “cool beans”, but they really are filled with air! All the items in this product line are dynamic, air filled seat cushions. They are used to help fidgety or under aroused students maintain an appropriate level of alertness and attending, by providing ongoing vestibular, (movement) input, in a manner acceptable in the classroom. Additionally, they help facilitate a more upright sitting posture, strengthen trunk muscles and reduce back strain from prolonged sitting. All are made of high quality plastic for durability and easy cleaning. Latex free. Easily transportable and great for home and school use.

BUMPY DISC JUNIOR SEAT CUSHION

This seat cushion is 13” in diameter, has one bumpy and one smooth side and inflation level can easily be adjusted. The greater the inflation level, the more movement possible. In general, it has a thinner profile than other disc’s. Also great for working on standing balance and for floor sitting. **C6451**

Great as a marker and floor sitting aid during “circle time” or any floor activity. Also used to improve balance in kneeling and standing. **C9110**

Use year after year to hold papers, folders, scissors, crayons, pencils and so much more. Two Velcro strips keep it attached to side of desk or chair for easy accessibility. MINI LOOP SCISSORS

Finally, the ease of a loop scissor in a small, child size. The 5 in. scissor has a wider grip area for greater stability and it automatically reopens when pressure is released. Great beginning scissor for pre-schools, first-time cutters, or those with small hands. Suitable for use with either hand.
C7343

PLASTIC STAND

This clever plastic stand converts the loop scissors to a tabletop cutter, requiring just downward pressure to close blades. No grasping of scissors needed. Blade guard provided for safety.
C7342

SQUEEZERS

Ideal scissors for people with limited finger mobility and coordination. Short metal blades are closed for cutting by squeezing the coated loop handles together. Blades open automatically when grasp is eased. Helps reinforce basic open and close pattern.
W5405 Discontinued

SUPER SCISSORS

Easy to use, battery powered scissors for cutting paper, card stock, craft foam and more. Allows adults and children with reduced strength and coordination to be functional cutters. Chunky, pistol grip handle for ease of grasping.
C8853 Discontinued

LOOP SCISSORS

Lightweight, self-opening scissor with a continuous molded plastic flexible loop. Actual handle is wider than most and longer cutting blades allow for easier feeding of paper. C7341R Right
C7341L Left

SELF OPENING LONG HANDLED SCISSORS

This scissor combines the added control of the long molded plastic finger opening with the greater ease of a self-opening mechanism. Isolated thumb hole facilitates isolated thumb movements. The result is greater success for even your most difficult cutters.
C7389R Right
C7389L Left

SELF OPENING SCISSORS

Looks like a conventional pair of high quality scissors with molded plastic finger openings. These scissors, however, will re-open automatically when pressure is released. This assists when finger strength and motor planning of the open/close pattern required for cutting is difficult. The finger holes are wider than most, to assist with finger stability. Isolated thumb and finger holes facilitates isolated finger movements. A nice scissor for those not ready for Benbow's.
C7362R Right
C7362L Left

SPECIAL NEEDS SCISSORS

Unique rotating spring-clip morphs this from a standard scissor into a "self opening" pair. Squeeze stainless steel blades closed by applying pressure through the finger holes or through the outside of the plastic handles. Once pressure is released the blades will open automatically. Works well for beginning cutters or for those with finger strength or mobility difficulties.
C1341

CRAZY CUTTER

Amazing "mouse" shaped cutting device utilizes new ceramic technology. The small ceramic blade at the tip will last forever but never cut your finger. It will cut paper, pictures, plastic packaging, shrink wrap and much much more. Held between thumb and index finger, cutting occurs as the Crazy Cutter is dragged along the surface of the paper. Since paper is cut while flat on table it only needs to be stabilized and not grasped. This will make cutting an easier and more successful task for many children and adults.
C7916

LIGHT-UP PENS

These clear pens with the blue crystal ball may be just the motivator you have been missing for improving writing endurance and adjusting writing pressure. With too much pressure the light in the end of the pen stays on. With too little pressure it does not come on at all. With typical variations of pressure the light will flash on and off. For those students who write too lightly, ask them to keep the light on as they write or draw. If they tend to push too hard, ask them to not let the light come on at all. The light provides immediate feedback as to what the hand is doing. For some people the

tactile feedback is not enough. But either way, kids love writing with these odd looking pens, so try 'em, you'll like 'em and your students may just write better with 'em!

HANDWRITING PAPERS REVIEWED: What a Difference a line makes!

A helpful resource compiled by two occupational therapists to help other therapists, teachers or parents, who provide intervention and/or recommendations for handwriting. The booklet outlines many of the different types of lined writing papers available by providing a brief narrative description along with an illustration of how the lines are used to guide letter placement. Sometimes providing the slightest adaptation achieves maximum changes in performance. Booklet helps organize a confusing subject.

W7027

HANDWRITER

This clever device does a number of things, all at one time to help maintain proper position of pencil in hand. To use: place the large loop around wrist, so that charm hangs straight down. Now hold charm into palm using ring and little fingers, then grasp pencil and place other loop around upper per end of pencil. The pull or tension created helps keep the pencil at an appropriate angle in the web space. Many children respond favorably to this pull saying, they like the feel in their hand. The friendly plastic charm, facilitates isolation of the two sides of the hand by keeping the ulnar side closed. Recommended for use with implements a minimum length of 5 inches.

BETTER BUMPY PAPER: COLORING BOOKS

We have begun referring to these as the "sky high" coloring books. That's because the raised outlines of the drawings are the highest we have ever seen. This provides the greatest quantity of tactile input and the greatest deterrent to coloring outside the lines. Wonderfully successful for children with poor coordination, sensory irregularities and/or low vision. Level one books are simpler with a single object to color. Level 2 pictures are more complex and scene-like.
